EDUCATION

University of Minnesota Twin Cities, Minneapolis, Minnesota

August, 2021 - October, 2025

Masters of Science, Medical Physics

CAMPEP Accredited

GPA: 3.5

University of Illinois at Urbana-Champaign, Urbana, Illinois

August 2018- December 2020

Bachelors of Science, Physics

GPA: 3.67

EXPERIENCE

Clinical Physics Assistant I

St. Louis, Missouri

Washington University in St. Louis

2023 - Current

- Independently perform machine QA for a Varian TrueBeam and Siemens CT.
- Assists in performing Annual QA for a Varian TrueBeam including recommendations from TG-142 and TG-51.
- Generate patient specific QA for IMRT and SBRT photon treatment plans with Eclipse including ion chamber and portal dosimetry for photon.
- Generated patient specific QA for proton treatment plans with Raystation, including for ion chamber, surface dose plane, and depth dose plane measurements.
- Develop a web-based chart checking script for proton therapy using the Raystation Python API.
- Investigate methods of 3D surface scanning for clinical use using LIDAR and laser scanning.
- Automate simulated phantom generation and CT generation using Python and the XCAT Phantom.
- Built Excel tools to streamline creation of Patient Specific QA task emails.
- Mentored project to rewrite an excel generator for Patient Specific QA in Python.
- Assisted in commissioning of a Varian Halcyon linear.
- Contribute to open source software, including pylinac and the Core Imaging Library.
- Automated highly sampled output factor measurements using Sun Nuclear PC Electrometer, reducing the measurement time from 2 hours to 40 minutes.
- Performed data collection for multiple research projects on the novel Varian Accela.
 - Developed Python tools to generate dicom radiation plans and developer mode XMLs for this machine.
 - Generating Varian Developer Mode XML files to collect highly sampled Winston Lutz measurements for longitudinal QA, reducing time from 4 hours to 1 hour per collection.
 - Characterization of ion chamber recombination factors over multiple detectors.
 - Improved efficiency of cross-institutional DLG measurements using the SNC PC Electrometer.
 - Evaluated recombination effect in DLG measurements.
 - Performed longitudinal daily QA using MPC, MaximQA, and SNC Daily QA.
 - Performed SRS QA using the SNC Mapcheck, Film, and the W2 detector for dosimetric evaluation of Neo Arc.
 - Performed TG-51 measurements for cross-institutional evaluation of output on the Accela.
 - Designed and performed measurements for Jaffe plots to evaluate Sun Nuclear detector performance.
- Performed commissioning for 2 Varian Accelas.
 - Collected beam scanning data using a large number of detectors.
 - Streamlined commissioning using automated dicom radiation plans and the SNC PC Electrometer.

Research Assistant/Graduate Assistant

Minneapolis, Minnesota

University of Minnesota Twin Cities

2021-2023

- Designed and iterated on a printed circuit board for hall effect sensors using KiCad.
- Implemented an algorithm in Python to measure motion of a magnet using hall effect sensors in real time using SciPy.
- Verified accuracy of the system by interfacing with a 3D printer to move the magnet.
- Performed quality assurance for diagnostic machines, including X-ray and Fluoroscopy.
- Prepared monthly reports and schedules for diagnostic imaging quality assurance.

Research Assistant

Urbana, Illinois

University of Illinois at Urbana-Champaign

2020-2021

- Simulated electronic responses for many configurations of an silicon photomultiplier(SiPM) array to add Pulse Shape Discrimination functionality to a commercially available board using Ngspice and Python.
- Collected data from a JSeries SiPM to compare to simulation.

SKILLS

Programming: Python, Rust, Embedded, Sensors

Clinical: Truebeam, Halcyon, Accela, Eclipse, Raystation, Doselab, PTW Beamsan, PTW Starcheck, SNC PC Electrometer, SNC 1D Scanner, SNC SRS Mapcheck, Patient Specific QA, Linear Accelerator QA, Fluoroscopic QA, X-Ray QA

Software: Excel, Microsoft Power Platform
